

# PROJECT FOCUS

## Odeon Cinema, Brighton

Roof System: Built-up Felt

# POLY ELAST RAPID-O SINGLE LAYER MEMBRANE OVERLAY

## PROJECT DESCRIPTION

The Brighton Centre was built in 1966 which was the previous site of the former Palladium Theatre / Odeon Cinema which was demolished in 1963.

Strata Waterproofing was brought in to invigorate the old roof.

## POLY ELAST RAPID-O SINGLE LAYER MEMBRANE

POLY-ELAST RAPID O is a single layer, bituminous membrane which is saturated and coated with high quality SBS (Styrene-Butadiene-Styrene) modified bitumen. It has a 180g/m<sup>2</sup> compound reinforcement and incorporates diagonal shaped channels on the underside which help to vent and control any entrapped roof moisture, eliminating any risk of blistering. In addition, the membrane features the latest graphite firewall technology within its formulation and has been fully fire tested as part of a designated system in accordance with EN 13501-5 and ENV 1187:2002, Broof Test 4.

POLY-ELAST RAPID O provides a cost-effective, fast-track method of overlaying existing roof coverings to provide a reliable, long-lasting waterproofing solution. The product is compatible with all common bituminous and asphaltic substrates.

## PROJECT PARTICIPANTS

Installer: SPV GROUP, Oxford

Size: 5,000m<sup>2</sup>

Sector: Commercial

Location: Kingswest, West St, Brighton BN1 2RE
